Topic: DNC Observations

Observations:

1. I created a coupon for the Alebrijes store that is not working (app and website). Please review and fix this.

2. I quoted a product on the website, and the UPS delivery quote was higher by \$2.00 and \$0.72 with USPS. A cheaper rate is not a problem if shipengine charges the insurance on each label. Is there a way to know this from the data received from the APIs?

Why is the UPS Ground service not including a Delivery Date? Why is it that UPS Ground is cheaper than the two-day delivery?

3. The rates do not coincide.
